

# JOSE B. GOMES

Software Developer

 5 Rosebank Road  
L36 3AB  
Liverpool  
UK

Full stack software developer, passionate about exploring cutting edge technologies that add value and deliver a delightful experience to customers and their business

## Employment

Sep 18 - date

JavaScript Engineer

Barclays

I took this new challenge working as part of the channels engineering team at Barclays. I don't yet know what this position will bring, but I see it as a big opportunity to take part on developing software that has a strong impact on customers while working for a renowned world class team.

Jan 17 - Sep 18

Senior Developer

Cybertill Ltd

Working for Cybertill Ltd, I had the challenge to help modernising a large multi-channel retail and ePOS system written in PHP / Symfony. As most legacy software, issues revolved around performance and maintainability. I tackled some of those issues proposing and introducing new technologies, such as Angular, Typescript, Elastic Search and GraphQL.

Sep 14 - Dec 16

Freelancer / Entrepreneur

Various

During my final year at university and my first year as a graduate, while juggling academic assignments and client based opportunities, I choose the flexibility of remote work. During that period, I also co founded Backbone Labs, a company aimed at developing a digitised version of RushHourCrush (a section from a famous newspaper in the UK). Along with that, I had the chance to work with well established digital agencies, such as Cyber Interactive, Capella and Thinkup.io (former Believe Creative), working on projects for large clients among Nominent, Greenery and Future First.

Mar 14 - Aug 14

Application Developer

Upcast Social

At Upcast Social, I broaden and deepen my knowledge and confidence in the realm of software development. Working in Agile environment along with a talented team that delivered the tools to create and manage online advertisement campaigns for Apple, Twitter and Facebook.

Mar 13 - Mar 14

Software Developer

Cyber Interactive

At Cyber, I had the chance to work for a small but busy web agency in the heart of London. Working within an Agile environment, I had the chance to interact with some large clients such as the RBS, JLL and Aviva.

Oct 07 - Mar 13

Junior Developer

CFS Europe

I first started working for CFS-Europe as a Hardware and Network assistant. Over the years, combining my knowledge of the company, hard work and the skills I earned during my degree, I managed to work my way up to the development team. Although a small company, some of the clients I worked with ranged among the NHS, Argos and Orange.

Other

Other jobs included IT Support / Help-desk, hospitality & family business.

## Education

Sep 12 - Jun 15

BSc Computing

Birkbeck University

This course covers the typical UK undergraduate curriculum in computing. After gaining a taste for functional programming, for my final assignment, I created a Hybrid app that explores a recursive NP complex problem.

Sep 08 - Jun 11

FD Web Technologies

Birkbeck University

This course covered most major topics in web development such as Web Standards, Typography, Relational Databases and Object Oriented Programming. For my final assignment, I developed a stock management tool.

Feb 07 - Dec 07

Hardware & Software

Lewisham College

This two stages course focused on principles of electronic engineering, operating systems and computer networks mixing a good blend of practical and theoretical work.
